Corporate profile

Atlatsa Resources Corporation (Atlatsa) is a black economic empowerment (BEE) platinum group metals (PGM) producing and exploration company, with assets located on the Bushveld Igneous Complex (BIC) of South Africa. The world's largest platinum deposit, the BIC, produces in excess of 75% of annual primary platinum supply to international markets.

The BIC hosts numerous PGM mines and prospects, mainly within the Merensky and UG2 reefs and the Platreef mineralised horizons. Atlatsa completed the acquisition of a controlling interest in Bokoni (formerly Lebowa Platinum Mines) from Amplats in 2009, and now operates this four-shaft mine complex, currently producing some 114,000 4E ounces annually. While the Bokoni acquisition initially gave Atlatsa a controlling interest in the Ga-Phasha Project, located adjacent to Bokoni, and the Boikgantsho and Kwanda Projects, this was revised subsequent to Atlatsa's refinancing, restructuring and recapitalisation transaction with Amplats in February 2012.

In terms of the transaction, Atlatsa will dispose of its entire interest in the Boikgantsho Project and the eastern section of the Ga-Pasha Project to Amplats.

Atlatsa's objective is to become a significant PGM company by focusing on organic growth opportunities at its Bokoni Mine. Post the transaction with Amplats, the consolidated Bokoni operations have a resource base in excess of 140 million ounces with an estimated life of mine in excess of 100 years.

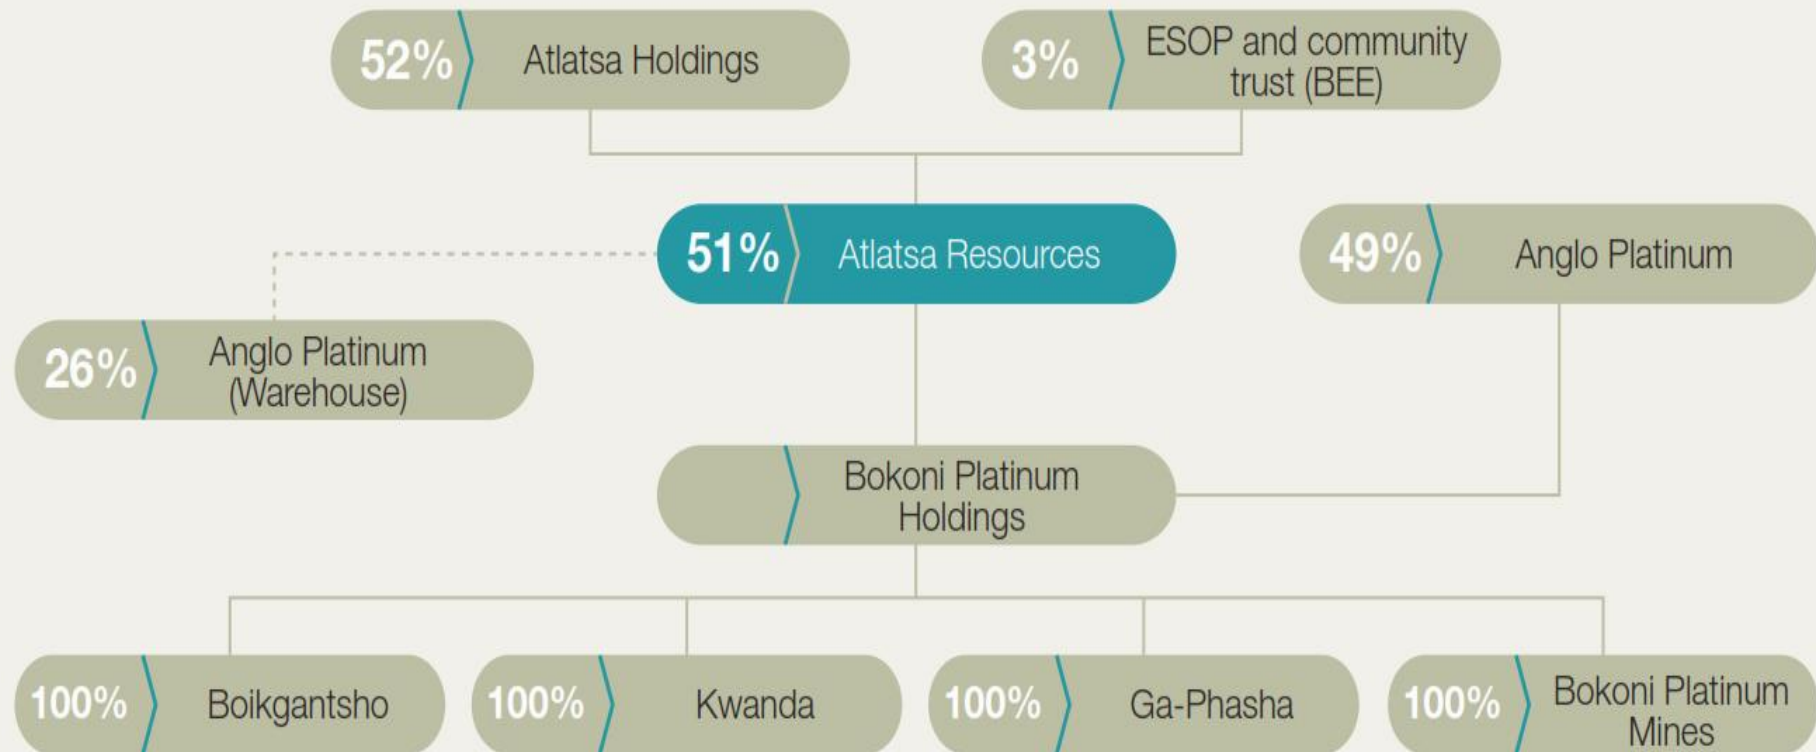

The Company's black empowerment roots are impeccable, with a 55% BEE interest split between Atlatsa Holdings (formerly Pelawan Investments), a broad-based, 42% women- and 100% black-owned company, community trusts and an employee shareholder trust.

Atlatsa has a primary listing on the TSX Venture Exchange (TSX-V: ATL), and secondary listings on the NYSE MKT (ATL) and the JSE Limited (JSE: ATL).

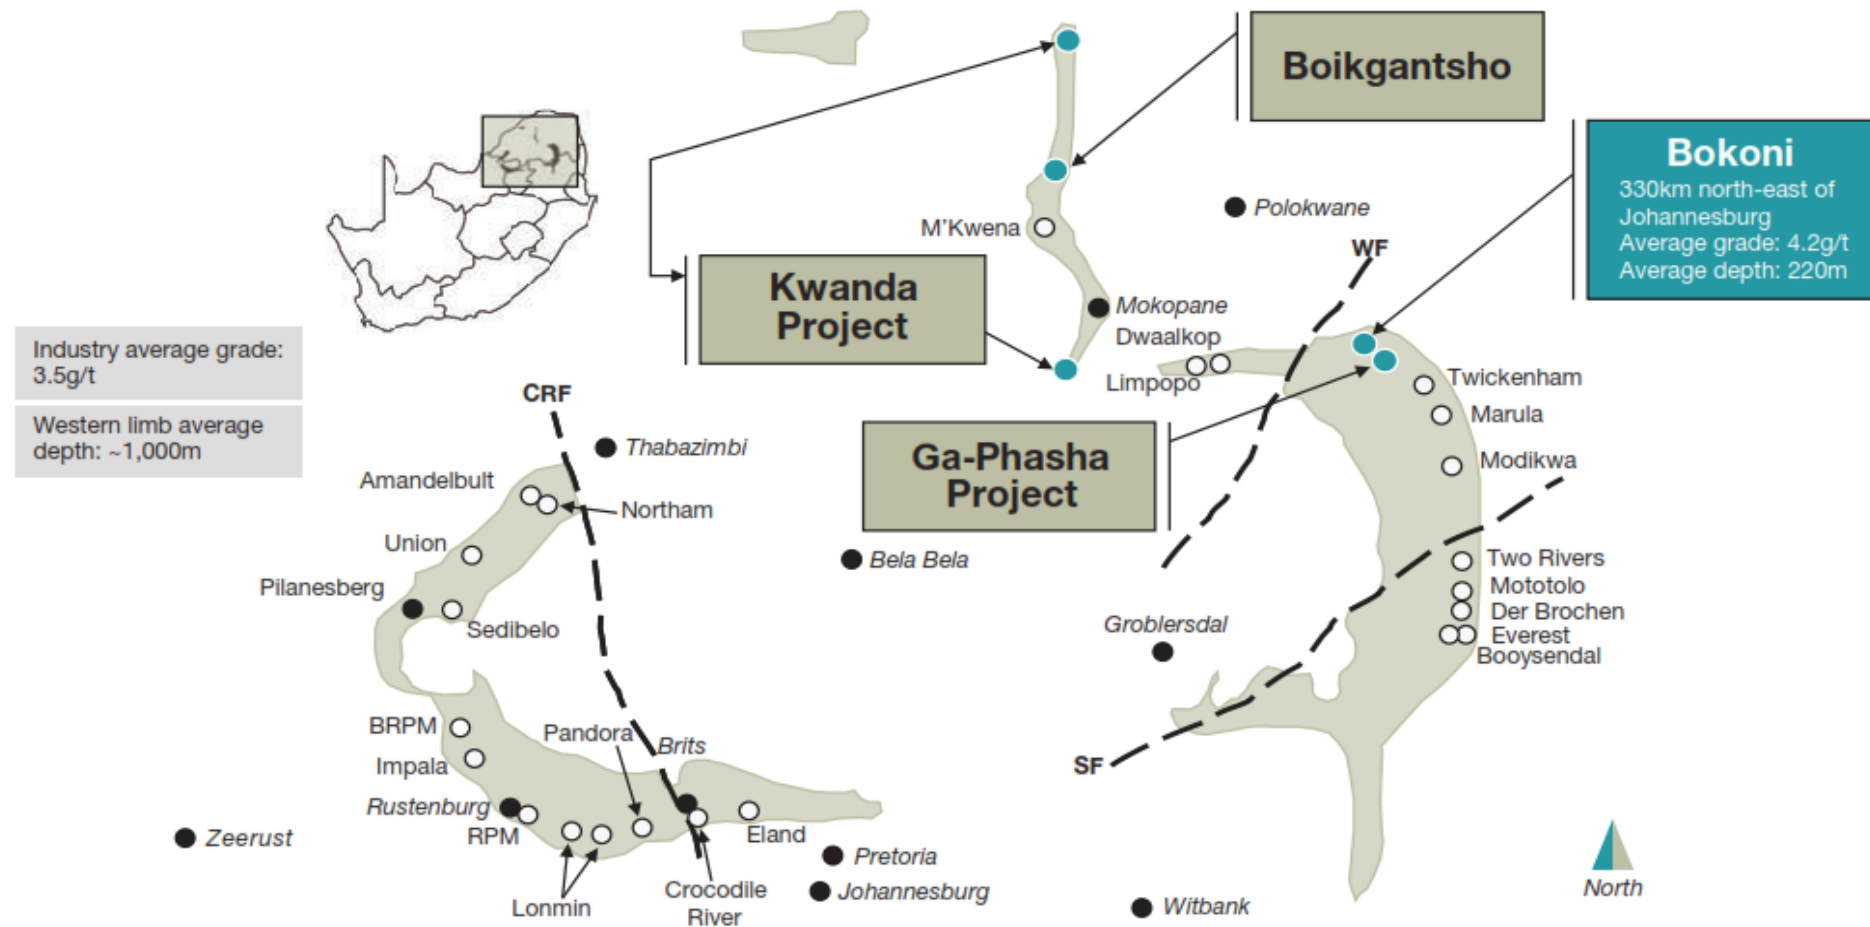

History

Corporate structure

South Africa's Bushveld Igneous Complex: Atlatsa mines and projects

Our Assets

Atlatsa controls and operates the Bokoni Platinum Mines, located on the eastern limb of the Bushveld Complex, and maintains a controlling interest in the Ga-Phasha Project, located adjacent to Bokoni, and the Boikgantsho and Kwanda Projects.

Bokoni Platinum Mines

Bokoni is located on the north-eastern limb of the Bushveld Complex on a property comprising two new order mining rights that cover an area of 15,460 hectares. The mining operation consists of a vertical shaft and three decline shaft systems to access underground development on the Merensky and UG2 reef horizons. Bokoni has road, water and power infrastructure, as well as two processing concentrators, sufficient to meet its operational requirements up to the completion of its first phase growth plans to 160,000 tonnes per month (tpm).

The mine currently produces approximately 95,000 tpm of ore but management remains confident that the objective of

achieving a production rate of approximately 160,000tpm will be realised. To operate the mill at optimum capacity, Bokoni is investigating opencast mining opportunities on both the Merensky and UG2 reefs to fill the mill gap. In February 2012, a new mine management team was appointed at the operations, led by Dawid Stander who has extensive experience in mining. The new team has made significant progress to date, focusing its efforts on key historical challenges including creating mining flexibility and improved relations with employees and stakeholders.

During the third quarter of 2012, Bokoni delivered its best quarterly operational performance since the Company took control of operations in July 2009.

Type of mining		Actual FY2011	Planned FY2012	
		Actual avg. tpm	Face grade (g/t 4E)	Planned tpm
Vertical shaft	Conventional	25,609	4.43	34,478
Brakfontein (new)	Hybrid	24,492	4.90	34,724
UM2 shaft	Conventional	8,707	4.10	12,181
Total Merensky		58,808	4.60	81,383
Middelpunt (UG2)	Hybrid	28,475	6.18	35,775
Grand total		87,283	5.10	117,158

KEY PLAYERS

Tumelo Motsisi

Executive Chairman

Tumelo Motsisi is a prominent South African businessperson with experience in the South African financial services, mining and energy sectors. Between 1994 and 1998 he was employed first as a senior manager and then as a director within the Negotiated Benefits Consultants division of Alexander Forbes, a South African financial services company. Tumelo has been a director of Atlatsa since September 2004 and is not a director of any other public companies.

Harold Motaung

Chief Executive Officer

Harold Motaung was previously employed at the Free State and Vaal River operations of Anglo American Corporation of South Africa Limited. He spent six years as a mining engineer and as a production supervisor. Harold then moved to the South African government's Department of Minerals and Energy (DME) director within the Mine Inspectorate. As a Deputy Chief Inspector, he was responsible for implementing the Mine Health and Safety Act. Subsequently he was appointed Chief Director within the Mine Inspectorate. His portfolio included the gold, platinum and coal regions of South Africa. He is a founding member of Atlatsa Holdings, the controlling shareholder of Atlatsa. Recently he was appointed and served on the board of Mintek as the Non-executive Chairman.

Harold has been a director of the Company since September 2004, and the CEO of Atlatsa since April 2011.

Dawid Stander

Managing Director: Bokoni Platinum Mines

Dawid Stander has 32 years of experience in the South African mining sector, having held senior positions at both mine and

executive level at BHP Billiton (Samancor), Anglo American Platinum (Lebowa Platinum Mines) and Impala Platinum. Dawid led the Bokoni Platinum Mines (formerly Lebowa Platinum Mines), in his capacity as General Manager, between 2001 and 2005. During this period Bokoni Platinum Mines expanded its annual production base by 100% from 100,000 PGM ounces to 200,000 PGM ounces.

Bava Reddy

Executive: Mineral Resource Management

Bava Reddy has 15 years of experience in the mining industry. Former positions include Senior Geologist at AngloGold Ashanti and General Manager at Harmony's Target operation.

De Wet Schutte

Chief Financial Officer

De Wet Schutte is a chartered accountant with significant experience in mining, corporate finance and business development. De Wet previously held executive positions at Renova Investments, Harmony and Mittal Steel, with responsibilities covering corporate transactions, project development and financial reporting in a listed environment. He is not a director of any public companies.

Joel Kesler

Chief Commercial Officer

Joel Kesler qualified as a lawyer in South Africa and has significant experience in mining finance and business development. He currently serves on Atlatsa's executive committee and is responsible for the Company's corporate and business development. He also serves as corporate secretary to the company. Joel is not a director of any public companies.
